Salut tout le monde,

We're Sunday night, but only now do I have a few minutes to publish the results of the HLG Nats which occurred on Friday. Birthday parties and other sports have taken a toll on my availability this weekend.

I think the event went fairly well. Breezy, but a nice day. A couple times the automatic countdown was problematic...after a few feet got caught in the wires...one of them being mine. Heurmm.

Let's start by thanking the sponsors. We had prizes for pilots and helpers too.

Our sponsors were:

Sombra Labs with a couple of crystal-free receivers.

Dymanic Hobbies and Multi-Hobbies our local stores with servos and glues.

Great Hobbies mail order store from PEI

And Icare Sailplane as well.

Thanks guys !

And remember to buy from our sponsors the next time you need something.

Thanks also for the helpers who showed up and gave a hand on registration, timing or just plain running around. Brian, Gudmund, Dick, Gordon, Mike

Stoneman, Terry.

Big thanks guys.

And Oh! We may even see this in the papers; as we had the visit from a female journalist taking pictures and notes.

A special thanks goes to Geoff, my co-CD.

Splitting the job made the experience almost enjoyable. 8-)

We still both sweat a lot and our scores reflected that.

We had 9 participants:

Jacques Blain coming back from a 3yr hiatus.

With Jacques Bissonnette (Biz) completing the Montreal picture.

A contingent from Toronto led by Doug Pike, including Ivan Mackenzie, Tom Rabieaga and I didn't get the name of the 4th gentlemen.

We also had a few Ottawa stragglers in the name of Paul Penna and Aurele Alain.

Geoff and I were forming up the rear guard.

Small but quality group.

I really appreciated the Toronto guys for making the trip up North.

We've got to find a way to visit you guys !!!!

The day was challenging and Doug Pike picked up the honors, followed by Ivan and reborn HLG pilot J.Blain.

The best part in all this for me was the BBQ at my place afterward and the

chit-chat, exchanging tricks and techniques and making new friends.

I should be able to eliminate that darned flutter now !!!

Check the pdf file attached for further details of the results.
