

MATS SPRING TUNEUP MAY 23RD 2009

A great turnout for the first inter-club series event of the year with 9 flyers making it out to the MATS field on Saturday May 23rd for the Spring Tuneup Contest.

Nice new Explorers in the hands of Dan MacCrae, Jacques Girard and Marc Alain. It appears to be a nice flyer, see the photos below. Ken Norris had a new home built Harley Michaelis designed Genie which shows a lot of potential, I'm sure Ken will have it sorted out in short order.

Bubble Dancers scored strongly with Duc Levan and

Stephen Barry proving once again, along with Ken's Genie, that home built models in the right hands, in the right conditions are a power to be reckoned with.

Rounding out the group were Aurele Alain with his trusty Starlight 3000, Luca Valle flying an interim Allegro light, and myself with my tried and true Artemis.

Weather was sort of grey and breezy early on but no one to my knowledge used any ballast except for Luca with an under 20 oz Allegro light.

Thanks to all who made it out and to Jacques Girard who took over my CD'ing duties when I had to leave unexpectedly after my Artemis

took a bite out of my wrist, see you all in two weeks at the ORCC field for the second event of the season!

Mark G.
